

## AMLO's Top 50 Roadmap: plans, speeches & ideas he talked about and where to find them....

November 13, 2018

The recent tone change from the incoming administration has brought a wave of uncertainty and questions from our local and offshore base of clients. This tone, contrasted with AMLO past acceptance speech, where the market and MXN assets in general welcomed him and translated into a positive performance.

Given the recent developments in AMLO's agenda (i.e. New Airport cancelation, Potential changes in Banking regulation and a potential "referendum economy"), we believe it's worth digging further into what the elected president and his team has expressed in the past few months and list these plans to have a clearer idea of what future potential changes could lie ahead.

**Please find below, a list of 50 plans, speeches & ideas we found relevant, as well as, a classification of positive, neutral and negative potential effects using MXN assets as a benchmark.** Even though there are many others we might have missed, we believe this is a good starting point to highlight future potential changes.

**In the following table, we rank from -5 (red) to +5 (green) the potential effects should AMLO's plans go into effect down the road.** As an example, please see "#9 Mexico City New Airport cancelation", we ranked it with a -4 as the impact for MXN assets was seen immediately.

Under our perspective and based on the potential impact we assigned to each proposal, if every concept goes into effect, **the final sum would add up to a negative balance of -39.**

Please contact the Equity and Fixed Income desk for any comments or feedback.

Thanks,

Finamex Team
